

Recruiting Patients Who Have Experienced or Are Currently Experiencing Delayed Hospital Discharge (i.e., Alternate Level of Care)

Have you experienced/are you experiencing a delay in transitioning from hospital to home or long-term care?

We Want to Hear from You!

A Toronto-based Alternate Level of Care Patient and Caregiver Advisory Council is recruiting patients with current or previous experience with delayed hospital discharge.

The Advisory Council has 2 main goals:

1) Provide direction/input on council activities (e.g., research studies about delayed hospital discharge, review guidelines for care, etc.)

2) Lead knowledge translation activities (e.g., strategize how study results can be shared with policy makers to make a difference in discharge processes)

What is Required?

Attend ~8 meetings over Zoom (or in-person, once safe to do so) for the next 12 months and provide input into council activities.

Meetings are approximately ~1-2 hours
